Facial Rejuvenation

We are using Nu skin Galvanic spa for facial rejuvenations

Acupressure

Bring the benefits of a spa experience home with you. Rejuvenate your complexion, revitalize your scalp, and refine your body.

The Galvanic Spa is a hand held device that delivers a low level galvanic current which facilitates the transport of the ingredients into the skin. In terms of price, the Galvanic Spa is reasonable alternative between expensive treatments like Mesotherapy and VelasMOOTH.

The goal of the Galvanic Spa is to give your skin a radiant, healthy-looking glow with a

combination of safe, gentle, low-level galvanic currents and two specially formulated gels. Using its unique Galvanic currents, the Galvanic spa is able to stimulate cell rejuvenation for your face, scalp, and body, while they remove toxins and impurities from your skin.

Beauty skincare routines have been in existence since people were able to see their reflections.

For more than 50 years, spa and salon professionals have used gentle galvanic currents in cus-

tomized treatments to refresh and energize the skin. These treatments, through a gentle massaging action, help to focus cellular energy and enhance circulation. These treatments stimulate blood circulation, bringing a number of benefits to the skin.

Galvanic Spa is recommended to be used with the Pre-Treatment and Treatment Facial Gels. These rejuvenating facial gels work with the face conductor to draw out dulling debris and allow pores to breathe, while delivering beneficial nutrients that focus energy and facilitate recovery from stress.

The pre-treatment gel with marigold, sea kelp, and vanilla extracts promises to help pores breathe and remove impurities, and condition and soothe tired skin.

Galvanic Spa Pre-Treatment Facial Gel helps remove impurities so your pores can breathe while Galvanic Spa Treatment Facial Gel revives and invigorates tired skin by promoting cellular energy. The treatment gel, with arginine and magnesium, helps skin recover from stress, promotes cellular energy, and further regenerates and hydrates the skin.

I have been using the Miracle II soap, neutralizer gel and lotion. These products are "negatively charged", as the pre treatment gels which are recommended with the Galvanic Spa are negatively charged on the number one fountain. The spa slides over the skin remarkably well. The soap or neutralizer gel, you may use both, or either, pulls the toxins from the skin, tightens the pores and reduces puffiness and wrinkles. My skin

looks ten years younger.
For my body I use the Galvanic Spa on the positive fountain then, spray a mixture of olive oil, and essential oils to remove cellulite and tighten my skin. There are many essential oils which are very beneficial for the face, and body,

The basis of the Miracle II products is that the water is first put through an electrical process known as eoptic energy. This process transforms it to include highly charged mineral clusters. Studies show that toxic chemicals would

literally be broken down and transformed into benign or usable beneficial by products by the action of the charged clusters.

Miracle II products all contain an electrically treated coconut based surfactant in addition to the ash of dedecyl sulfate. Miracle II is a gentle, environmentally friendly, biodegradable soap with remarkable cleaning, cleansing, degreasing, neutralizing, and detoxifying attributes and contains no animal fats, harmful chemicals or preservatives. Miracle II Neutralizer restores proper functioning at a cellular level because it balances the fluids in your body and, in turn, results in proper absorption of nutrients. Miracle II Neutralizer Gel is an incredibly effective skin-repair lotion. This extracted substance from the soap was labeled "neutralizer" and it became very popular with Miracle II users. for use on the skin, which resulted in more testimonials on the beneficial effect of Miracle II on the skin, including clearing up acne.

Neutralizer gel contains electrically engineered eoptic energized stabilized oxygenated water, Ash of Dedecyl solution, Calcium, Potassium, Magnesium and Carbopol 940. Moisturizing Soap also contains vitamin E, and cold pressed avocado, almond, coconut and olive oils. Moisturizing Soap and Neutralizer Gel also available in gallon size. Liquid Detoxifying Moisturizing Soap is a blend of three of the Miracle II Products, the Soap, Neutralizer, and the Skin Moisturizing Lotion are specially formulated into this Moisturizing Soap.
